+ - antivirus successfully removed the active infection, and the system was restored (or was not damaged).
- - antivirus solution failed to remove the active infection or the system's integrity was seriously damaged

Avast! Professional Edition 4.7.1029

Malware name	Result	Details
Adware.Win32.Look2me.ab	+	Autorun key remained in the system registry.
Adware.Win32.NewDotNet	+	Autorun key remained in the system registry.
AdWare.Win32.Virtumonde.bq	+	Autorun key remained in the system registry.
Backdoor.Win32.Haxdoor.ix	-	Detected and deleted dvb03a.dll file but the other files (dvb03a.sys,dvb06a.sys,qo.sys,qo.dll) weren't detected.
Backdoor.Win32.PcClient.ca	+	Autorun key remained in the system registry.
Email-Worm.Win32.Scano.ac	-	Windows Desktop disappeared after deleting malware file and restart (autorun key remained in the system registry).
Trojan-Clicker.Win32.Costrat.l	-	The trojan isn't detected.
Trojan-Downloader.Win32.Agent.brr	-	The trojan isn't detected.
Trojan-Downloader.Win32.Agent.brk	-	The trojan isn't detected.
Trojan-Proxy.Win32.Agent.lb	+	Autorun key remained in the system registry.
Trojan-Proxy.Win32.Wopla.ag	+	Autorun key remained in the system registry.
Trojan-Proxy.Win32.Xorpix.ba	+	Autorun key remained in the system registry.
Trojan-Spy.Win32.Bancos.amm	+	Autorun key remained in the system registry.
Trojan-Spy.Win32.Goldun.ls	+	Autorun key remained in the system registry.
Virus.Win32.Gpcode.af	-	Didn't restore encrypted files.
Rootkit.Win32.Agent.ea	-	The trojan isn't detected.
SpamTool.Win32.Agent.u	-	The trojan isn't detected.

"Trojan isn't detected" means that antivirus didn't detect the malware in infected system, but successfully detected malware installer.

AVG Anti-Virus 7.5.476

Malware name	Results	Details
Adware.Win32.Look2me.ab	+	Autorun key remained in the system registry.
Adware.Win32.NewDotNet	-	System error during system start, because malware autorun key was remained in the registry. Disappeared the internet connection.
AdWare.Win32.Virtumonde.bq	+	Autorun key remained in the system registry.
Backdoor.Win32.Haxdoor.ix	-	Detected and deleted dvb03a.dll file but the other files (dvb03a.sys,dvb06a.sys,qo.sys,qo.dll) weren't detected.
Backdoor.Win32.PcClient.ca	+	Autorun key remained in the system registry
Email-Worm.Win32.Scano.ac	-	Coudn't delete malware file, which restored again after system restart.
Trojan-Clicker.Win32.Costrat.l	-	The trojan isn't detected.
Trojan-Downloader.Win32.Agent.brr	-	The trojan isn't detected.
Trojan-Downloader.Win32.Agent.brk	-	Detected and deleted only ip6fw.sys file which appeared again after system restart.
Trojan-Proxy.Win32.Agent.lb	+	Autorun key remained in the system registry.
Trojan-Proxy.Win32.Wopla.ag	+	Autorun key remained in the system registry.
Trojan-Proxy.Win32.Xorpix.ba	+	Autorun key remained in the system registry.
Trojan-Spy.Win32.Bancos.aam	+	Autorun key remained in the system registry.
Trojan-Spy.Win32.Goldun.ls	+	Autorun key remained in the system registry.
Virus.Win32.Gpcode.af	-	Didn't restore encrypted files.
Rootkit.Win32.Agent.ea	-	The trojan isn't detected.
SpamTool.Win32.Agent.u	-	Deleted *.nls file but it was restored after system restart. Couldn't check ndis.sys.

"Trojan isn't detected" means that antivirus didn't detect the malware in infected system, but successfully detected malware installer.

When using information taken from Anti-Malware-Test.com, you are required to include a reference to the source material!

Avira AntiVir PE Premium 7.0

Malware name	Results	Details
Adware.Win32.Look2me.ab	-	Didn't detected all malware files.
Adware.Win32.NewDotNet	-	System was hunged up after multiple detection of malware file.
AdWare.Win32.Virtumonde.bq	+	The malware file was deleted after rename and system restart. Autorun key remained in the system registry.
Backdoor.Win32.Haxdoor.ix	-	Detected and deleted dvb03a.dll file but the other files (dvb03a.sys,dvb06a.sys,qo.sys,qo.dll) weren't detected.
Backdoor.Win32.PcClient.ca	+	Autorun key remained in the system registry.
Email-Worm.Win32.Scano.ac	-	Coudn't delete malware file, which restored again after system restart.
Trojan-Clicker.Win32.Costrat.l	-	The trojan isn't detected.
Trojan-Downloader.Win32.Agent.brr	-	The trojan isn't detected.
Trojan-Downloader.Win32.Agent.brk	-	Detected and removed only ip6fw.sys file which was restored again after system restart.
Trojan-Proxy.Win32.Agent.lb	+	The malware was deleted after rename. Autorun key remained in the registry.
Trojan-Proxy.Win32.Wopla.ag	-	The trojan isn't detected.
Trojan-Proxy.Win32.Xorpix.ba	-	The trojan isn't detected.
Trojan-Spy.Win32.Bancos.amm	-	The trojan isn't detected.
Trojan-Spy.Win32.Goldun.ls	+	Detected and renamed asusrx20.dll. Deleted malware driver after system restart. Autorun key remained in the system registry.
Virus.Win32.Gpcode.af	-	Didn't restore encrypted files
Rootkit.Win32.Agent.ea	-	The trojan isn't detected.
SpamTool.Win32.Agent.u	-	Deleted *.nls file but it was restored after system restart. Couldn't detect ndis.sys.

"Trojan isn't detected" means that antivirus didn't detect the malware in infected system, but successfully detected malware installer.

Dr.Web Anti-Virus 4.33.3

Malware name	Results	Details
Adware.Win32.Look2me.ab	-	Winlogon process was closed with a critical error after reboot. The fast scan during antivirus installation didn't detect the malware.
Adware.Win32.NewDotNet	-	Error in mail defence module. The adware wasn't deleted.
AdWare.Win32.Virtumonde.bq	-	Couldn't delete the adware file.
Backdoor.Win32.Haxdoor.ix	+	Detected and deleted all malware files after two requested system restarts. Autorun key remained in the system registry.
Backdoor.Win32.PcClient.ca	-	The trojan isn't detected.
Email-Worm.Win32.Scano.ac	-	Couldn't delete malware file, which restored again after system restart.
Trojan-Clicker.Win32.Costrat.l	-	The trojan isn't detected.
Trojan-Downloader.Win32.Agent.brr	-	The trojan isn't detected.
Trojan-Downloader.Win32.Agent.brk	-	Detected and removed only ip6fw.sys file which was restored again after system restart.
Trojan-Proxy.Win32.Agent.lb	-	The trojan isn't detected.
Trojan-Proxy.Win32.Wopla.ag	-	The trojan isn't detected.
Trojan-Proxy.Win32.Xorpix.ba	-	On-access scanner blocked malware file during the system start. The malware remained active.
Trojan-Spy.Win32.Bancos.amm	-	The trojan isn't detected.
Trojan-Spy.Win32.Goldun.ls	+	Autorun key remained in the system registry.
Virus.Win32.Gpcode.af	-	Didn't restore encrypted files
Rootkit.Win32.Agent.ea	-	The trojan isn't detected.
SpamTool.Win32.Agent.u	-	Deleted *.nls file but it was restored after system restart. Couldn't detect ndis.sys.

"Trojan isn't detected" means that antivirus didn't detect the malware in infected system, but successfully detected malware installer.

F-Secure Anti-Virus 2007 7.02.395

Malware name	Results	Details
Adware.Win32.Look2me.ab	-	Didn't detected all malware files.
Adware.Win32.NewDotNet	-	The malware was successfully deleted but disappeared the internet connection.
AdWare.Win32.Virtumonde.bq	-	The trojan isn't detected.
Backdoor.Win32.Haxdoor.ix	-	The trojan isn't detected.
Backdoor.Win32.PcClient.ca	+	Autorun key remained in the system registry.
Email-Worm.Win32.Scans.ac	-	Couldn't delete the malware file, which restored again after system restart.
Trojan-Clicker.Win32.Costrat.l	-	The trojan was detected, but F-Secure couldn't delete it.
Trojan-Downloader.Win32.Agent.brr	-	Trojan isn't detected
Trojan-Downloader.Win32.Agent.brk	-	Detected and deleted ip6fw.sys file, but hung up in checking runtime2.sys.
Trojan-Proxy.Win32.Agent.lb	+	Autorun key remained in the system registry.
Trojan-Proxy.Win32.Wopla.ag	-	The trojan was detected, but F-Secure couldn't delete it.
Trojan-Proxy.Win32.Xorpix.ba	-	The trojan isn't detected.
Trojan-Spy.Win32.Bancos.amm	-	The trojan isn't detected.
Trojan-Spy.Win32.Goldun.ls	+	Autorun key remained in the system registry.
Virus.Win32.Gpcode.af	-	Didn't cure files of all types.
Rootkit.Win32.Agent.ea	-	The trojan isn't detected.
SpamTool.Win32.Agent.u	-	BSOD after the first restart after the antivirus installation.

"Trojan isn't detected" means that antivirus didn't detect the malware in infected system, but successfully detected malware installer.
